

Monitor / Sensor T260 Infrared thermo hygrometer

Ex Tax: 390.00€

Precision climate measuring device with outstanding measurement accuracy, integrated pyrometer and dew point alarm function. Whether measuring air and dew point temperature or determining the relative, absolute and specific humidity – the T260 offers all advantages and measurement options of the T210, yet enhances its thermohygrometer function by an integrated laser pyrometer incl. dew point alarm signal generator – all in only one device. Technical data: Air temperature measuring range: -20°C ... +50°C. Air humidity measuring range: 5...95 % RH. Surface temperature measuring range: -20°C ... +60°C. Air temperature resolution: 0.1°C. Air humidity resolution: 0.1 % RH. Surface temperature resolution: 0.1°C. Air temperature accuracy: $\pm 0.2^{\circ}\text{C}$ (0 to 40°C) otherwise $\pm 0.4^{\circ}\text{C}$
