

Identification Tags Tyvek, Archaeological Lbls 100x150 (500/pkg)

Ex Tax: 118.98€

Identity tags for artifacts and specimens, very strong, tear proof, waterproof, can be used outside since the wet will not affect them. Tyvek is acid free, light weight, resistant to harsh chemicals and can be easily over printed. Tag has eyelet reinforced hole, supplied without ties. We suggest our acid-free twine is used for ties, so you can cut to the necessary length.
