

Watermark Reader Ultraslim A3

Ex Tax: 672.00€

Use of a Light Emitting Capacitor (LEC). Based on electroluminescent, flexible, lightbulb technology, with light emitting phosphors. The light panels are powered by an AC signal. Power adapters convert standard 230Volts 50 Hertz AC into the required AC voltage and frequency needed to light the panels at a predetermined brightness. External dims : 297mm x 420 mm, Internal 275 mm x 398 mm.
