

NWS Series EX modular LH2S

Ex Tax: 1,388.00€

Ex is modular seating system. Its definite advantages include a unique and characteristic design as well as the availability of 18 units with low as well as high backrests which can be used to section off meeting areas within an office. Ex helps to create excellent arrangements for creative and dynamic meetings with many participants as well as private and more intimate talks in groups of two or three people. Not only do Ex arrangements section off space but they also form an acoustic barrier ensuring peace and quiet. It is perfect for quiet business negotiations. The possibility of upholstery in the special fabrics and the use of sound-absorbing foam to increase the acoustic sound system. The armchair is made based on a solid-wood structure which gives it extreme durability. The following materials are used in the structure: solid wood, fine chipboard and plywood. The armchair has metal legs made from circular profile tube. Tube diameter is 18 mm. Individual components of the leg are argon-welded which gives them an aesthetically pleasing look. The chromium coatings are made in the C-Super class (raised quality handpolished surfaces). Each leg is fitted with plastic glides in black.
