

ANC-LA Conference Series Genia

Ex Tax: 1,934.00€

Auditorium and conference armchair, with an elegant minimalist design associated with innovative technological solutions. When closed, the seat has the appearance of a compact wall; a monolith inserted in the flooring surface, in which all possible sources of disturbance are designed to remain hidden within the volume. The metal bearing frame is fixed directly to the floor, so as to eliminate any visible supports; while the two armrests, which open in synchronism with the seat, are regulated by a foldaway movement with a cushioned closure that integrates them with the seat itself. Carefully studied in every detail, Genia guarantees high technical performance and safety, combined with outstanding comfort and environmental quality.
