

EB Shelving Gothia plain

Ex Tax: 0.00€

Gothia is shelving with character. Uprights of steel tubes. Grey textured lacquer. Edging on the front edges. All aspects of the design state strength and stability. Nevertheless, the shelving gives an overall impression of lightness, with sides that are open frameworks. Retain that openness, or develop its character in the environment you want to create. You may choose an end panel of frosted glass, for example. Or perforated steel or wood. You can have double-sided shelving that stands alone in the centre of the room. And exclusive edging of round, solid wood. No matter which accessories you choose, you can create a functional environment that is totally in tune with the moment.
