

Sonic Chair (sit around sound) w/ iPod /iPhone Docking station

Ex Tax: 11,100.00€

The sonic chair provides a unique audio experience, allowing you to sit at the very centre of a sound system. The integrated sound-system including a body-focused sound membrane allows to connect a variety of audio players. The specially developed six-channel amplifier in patented class-D technology with integrated digital signal processor (DSP) enables us to program individual sound settings. All materials meet the current environmental requirements. The outer upholstery is made out of artificial leather, cremewhite and fine grained. Inside we use the breathable microfibre >Waterborn< by Kvadrat in suede look. Both materials guarantee a high light and abrasion resistance.
