

MicroClimate Control PPS8 (active)

Ex Tax: 0.00€

Museum Climate Control System. A recirculating system is designed to provide accurate and reliable relative humidity control for a single enclosure. With a capacity of up to 500 cu ft / 16 cu m or more, depending upon case leakage rates and ambient temperature variations. Sensitive artifacts are constantly surrounded by humidity air generate and controlled by the system. The system will maintain constant relative humidity levels in an enclosure even as the ambient temperature in the surrounding gallery changes.
