

Microscope Stereo 3.5X-90X Trinocular on BB Boom Stand Ex Tax: 1,014.00€

Microscope Stereo 3.5X-90X Trinocular on Ball Bearing Boom Stand. This is a trinocular 3.5X-90X zoom stereo microscope on a versatile ball-bearing boom stand, giving crystal clear sharp images. It comes with a trinocular head with 30mm super widefield, high-eyepoint WF10X/20 eyepieces and a ball-bearing double-arm boom stand. The ball-bearing design allows you to move the microscope head forward and back so easily that you can have it done by the touch of a finger. The trinocular port enables to add photographic or video capability. This microscope offers high resolution, super widefield of view, large magnifying zoom range and long working distance. It is an ideal instrument for engravers, gemologists, circuit board inspectors and anyone in semiconductor and/or electronics industry. This microscope is made by the same technicians and on the same production line that makes optical instruments for Leica, Zeiss, Nikon and Olympus. Specs: 3.5X-90X zoom microscope on ball-bearing boom stand. Super widefield optics w/ crisp clear stereo images. Ball-bearing stand offering effortless moving adjustments. 65mm field view and 200mm working distance. Trinocular Port for adding photo / video capability.
