

Microscope Stereo 7X-90X Industrial Inspection w/144-LED

Ex Tax: 608.40€

This is a binocular stereo microscope with a 144-LED compact ring light. The microscope has a super widefield optical system that provides a large zoom magnification power (13:1) and a large working distance (4", 100mm). The 144-LED ring light has a compact design and a built-in dimmer, providing cool, even and bright LED illumination. This microscopy system is an ideal instrument for manufacturing engineers, lab technicians, gemologists, circuit board inspectors, and anyone in electronic and semiconductor industries. It is also the right microscope for biological laboratory applications that require low heat release. Specs: 7X-90X zoom magnification power with crisp sharp images. Super widefield high-eyepoint optics. 1-1/4" (33mm) super widefield of view and 4" (100mm) working distance. Sturdy all-metal pillar stand. 144-LED compact ring light with dimmer.
