Data Logger Temperature + Humidity DL200H Prof

Ex Tax: 519.48€

Professional data logger for tamperproof logging of climate data. Professional software with a variety of valuable functions included as standard! The measuring device comes with pro software! Technical Data: Internal sensor (temperature). Principle: NTC. Measuring range: -20 °C to +50 °C. Accuracy: ±0.3 °C (0 to 40 °C), otherwise 0.5 °C. Display resolution: 0.1 °C. Internal sensor (humidity). Principle: capacitive. Measuring: range: 10 to 95 % RH. Accuracy ±2 % RH. Display resolution: 0.5 °C RH. Memory organisation. Data memory: integrated flash memory with 16 MB memory capacity (approx. 3,200,000 measuring values). Data logging: up to 20 measuring channels parallel
