

FCC Series Figura T Side Table

Ex Tax: 258.40€

With this side table, Stephan Veit has redefined the term aesthetics. His play with round shapes is very professional – the designer has converted the ideal proportion harmonic. Formally reduced to the essential, the glass plate appears almost extravagant and it gives the table a surprising finish. This table has a handy presentation and an extra-ordinary haptic so that one has pleasure in changing its location. Walnut solid wood (USA imported). Designed: 2008.
