

FCC Series 2451 Armchair fabric

Ex Tax: 275.50€

The chair is part of a large series of wooden furniture that Søren Holst designed for Fredericia Furniture in 1984. The design is simple, functional and unmistakably Nordic. The light yet comfortable sofa is marked by its visible construction which expresses honesty and which allows the wood to come into its own. The series is built around a flexible system whereby the armrests on the chairs and sofas fit perfectly with the side tables. This allows a variety of combinations so the furniture always accommodates the specific needs of the home. The furniture is available in oak with fabric or leather cushions.
