

EUN Series Metal Lockers 250w-2door-modules1

Ex Tax: 133.25€

The NEW LINE (metallic) series consist of a steel body (different finishes available, including powdercoated, galvanized and PVC-coated), and a range of door finish options, including metallic, melamine and phenolic. In this way, we are able to offer lockers that are fully guaranteed, and in a variety of finishes. There are several closing systems: standard key, master key, padlock, coin, spring, combination, etc in order to satisfy an array of needs. Exterior Dimensions: Standard height 1800 mm, Standard depth 500 mm, Standard widths: 250, 300, 400 and 500 mm. The thickness of the cold rolled steel sheets used for the sides, backs, tops, frames and shelves is of 0.6 mm ("Fe P01" type steel, according to the European regulation EN 10.130-90). The door sheets have a thickness of 0.7 mm ("Fe P01" type steel, according to the European regulation EN 10.130-90).
