

Bonaparte chair

Ex Tax: 5,614.00€

Steel tubing, beech, rubber, upholstery. Bonaparte is one of the seldom cases in which the luxurious comfort of an upholstered chair has been successfully united with a tubular steel construction. The result communicates both ease and convenience. Actually conceived as a piece for drawing rooms, Eileen Gray found Bonaparte so pleasant that she used it for decades as her desk chair in her Paris home at Rue Bonaparte. Design Eileen Gray, 1935.
