

AB Series FROST (επιδαπέδιο) - red

Ex Tax: 479.00€

Frost is a new type of screen that has been made from a type of expanded metal usually seen in slightly less refined environments in staircases, grating and flooring. The inspiration of Frost came from rime and the Scandinavian climate. The flocked surface contrasts nicely against the metal and lends the furniture a soft feel. The surface is flat, yet still vibrant and tactile. The combination of materials makes Frost a unique partition, which is both open and airy, while also providing a screen. The screen is easy to assemble with an allen key.
