

PA Series 360 Quick Room 2300H x 2600W

Ex Tax: 1,315.00€

A high-quality folding portable partition that helps you maximize the use of your facility's space. The fiberglass panel construction offers enhanced, superior acoustics. Each Mobile Room Divider panel rotates 360° for infinite configuration possibilities using a patented 360 degree hinge. Unlike piano hinges the particular hinge allows each panel to turn any direction, at any angle..The no-pinch seams between each panel also reduce the possibility of fingers getting pinched. The elegant extruded aluminum frame makes it strong yet lighter than partitions with steel frames. Each aluminum panel frame is joined through a unique cast aluminum corner joint providing superior strength and durability. Used in offices, boardrooms, meeting rooms, schools, gyms, classrooms, offices, warehouses, retail stores, etc.
