

PA Series Freestanding Partition 1780H x 2290W

Ex Tax: 670.00€

It is a 3 panel space divider that provides sight and sound privacy for a variety of applications ranging from nursing stations, pharmacy consultations, vaccinations, health screening, immunizations, voting areas, small break areas, meeting rooms, and the home. Features include: Strong stability for hanging artwork and whiteboards over the top of the partition. Each acoustical panel has a tackable surface for tacking artwork or information pieces. Acts as a mobile noticeboard or gallery, as well as a partition or room divider. It is constructed of extruded aluminum profiles joined with cast aluminum corners joints for lightweight strength, durability and stability. The seams between each panel are constructed with extruded aluminum to prevent a pinch point when rotating panels. Features a patented 360 degree cast aluminum hinge allowing full rotation of each panel. Each panel is wrapped with acoustical flame retardant fabric. Easy to move, fold and store.
