

PA Series Budget MP6 Separe 1850 x1850

Ex Tax: 430.00€

This folding partition is a shorter version and offers all of the technical features of the MP10 model. It is constructed of heavy 16 gauge 1.25" round steel tubing with an industrial strength powder coat finish, and connected by rounded plastic corner joints for safety. The attractive and durable 12 oz cotton fabric panels are tensioned between the tubular steel frame. Each panel is connected to the other via a patented 360 degree hinge. The combination of lightweight and safe materials makes it a popular choice for schools, churches, and warehouses.
