

PA Series Steel Barricade 1090H x2440W

Ex Tax: 185.00€

This Steel Barricade is a durable and lightweight steel barricade constructed of tubular steel with welded joints. Perfect for concert or event crowd control, these barricades are linkable, to accomodate any sized area. Other uses include street / bicycle race barricades, traffic safety gates, and construction zone barricades. The feet are removable or foldable, so many of these portable barricades can be layed together for quick and easy storage. The removable feet can rotate 22.5 degrees to allow for nesting of steel barricades during storage.
