

Waver lounge chair

Ex Tax: 2,320.00€

The Waver armchair is the first collaborative project between Vitra and Konstantin Grcic. Waver embodies a new aesthetic, incorporating materials and construction principles from the outdoor sports that inspired the design. The idea behind Waver was to deliberately not use a conventional armchair typology. Though its technical construction is simple, Waver offers the very comfortable seating one generally associates with classic upholstered furniture. The energetic colorfulness of the fabrics and the clearly emphasised connecting and functional elements give Waver its sporty look and feel. Powder-coated steel, polyurethane, neoprene, plastic. Design Konstantin Grcic, 2011
