

Horizontal Cabinets 1506W x 960D x 488H 10 drawers 25H

Ex Tax: 2,195.89€

We have been supplying these conservation quality cabinets for a number of years to Libraries, Museums and Archives who require archival quality storage, for larger papers, textiles, charts, maps, posters and drawings. Our "Rollerglide" drawer system is only available for 50mm deep drawers, steel rollers give optimum smooth drawer operation. The "Sureglide" range is available in 25mm, the shallow drawer is especially useful when only a small amount of rare paper or single textile are placed in one drawer. Retaining channel at back of each drawer prevents charts, maps etc from curling upwards avoiding damage when opening drawers. Cabinets can be stacked on top of each other. Legs 250mm high for raising the cabinet to a working height. Plinth 102mm high allows the cabinet to be raised to allow the bottom drawer to be higher from the floor. Security Locks lock all drawers on the cabinet. Colours can be mix and match for panels, frame and drawers. Available in light grey, dark grey, mid grey, white, beige, brown, blue and red. Please note: mid grey will be delivered if colour is not specified on the purchase order. Paintwork is conservation quality powder coated which does not off gas making the cabinet archivally safe.
