

**ME Series H559mm PlanStore PS P2-A0 of W 1118 x D 901** Ex Tax: 1,568.20€

The Randall Planstore Rolled Filing System is a unique way to store extra long drawings such as seismic sections, geological prints and full scale drawings. Drawings are rolled-up and stored in the individual holders and secured by coloured end caps. The number of holders per unit is 300 and the average number of drawings per holder is 5 (dependent on weight and length of drawing). Features: Large Capacity storage, Index Referencing caps, Steel body for strength. Benefits: Maximising storage per cabinet footprint, Easy to use, Can be dismantled and re-assembled.
