

ANC Wood slab series Coffee table MANDALA L6

Ex Tax: 0.00€

The Mandala Coffee Table is made as a mosaic of salvaged wood pieces from different species, arranged together to form this unique table top. Designed to use what is left over from the production of larger furniture items such as cocktail tables, dining tables and consoles, the Mandala Collection uses scraps of hardwood collected from our own manufacturing process, which is then integrated with metal and glass. The Mandala Coffee Table has a powder-coated steel base which crosses through the wood mosaic and serves as the support for the round ½" thick glass top.
