

ANC Wood slab series Coffee table Toco z11

Ex Tax: 0.00€

Made with a single slab of Tamburil wood, this live edge coffee table was designed based on the unique characteristics of the wood. Each leg crosses through and is visible from the top. The natural split at the center of the slab became the focal point of this piece in the design process. One of this piece's distinguishing characteristics is the contrast created from the very light colored sapwood to the dark and beautifully grained heartwood. Combine that with natural imperfections of the slab and you get this beautiful piece made of reclaimed Brazilian Tamburiuva wood.
