

Leakproof Specimen Bags 6x10" Single-Pouch - w/absorbing sheet - 200/pkg

Ex Tax: 141.96€

Leakproof Specimen Bags. Our Specimen Bags are designed to contain liquid if a urine bottle should leak. The bags utilize a unique adhesive strip which forms a leak-proof, tamper-evident seal that is impossible to reopen without destroying the bag. These bags are available with or without Liquid Absorbing Sheets which contain an immobilizing agent that "gels" when it comes in contact with urine. Unlike liquid absorbing packets, our sheets will absorb from a few drops to the entire contents of a specimen bottle. Our Single-Pouch Specimen Bags are available in either one or double bottle versions.
