

ANC-LA Conference Series Jumpseat

Ex Tax: 0.00€

JumpSeat is a very compact chair, that is ideal for auditorium, lecture halls, hospital corridors and other public areas where space for seating is limited. Folding to less than 10 cm. thick when not in use, the compact seat allows for the maximum amount of people in the minimum amount of space. The JumpSeat's distinctive design is crafted around the elements of cantilevered bridges and the human spine which use thick rigid compression elements with thinner, more flexible tension components. Flex Spring Seat. The compressive and tensile strength of plywood slats and steel produce the innovative folding mechanism within the chair supporting up to 270 Kilograms. Folding to less than 100mm. when not in use, this compact chair is ideal for auditoriums, lecture halls, hospital corridors and other public areas where space for seating is limited. Straight or Radius Row Configurations. Flat, Sloped or Tiered Floor Installations.
