

Wall Mounted Light Panel - 2 x A4 Portrait Pockets

Ex Tax: 288.00€

This Wall Mounted Light Panel has 2 x A4 portrait pockets which are illuminated by energy efficient LEDs. It features a black acrylic panel onto which the pockets fit. The pockets simply hook in and out of the panel, allowing easy access whilst still maintaining a secure fit. There are no dark shadows due to the unique design of the light panel which ensures an even distribution of light. They are powered by a 12 volt transformer, which simply plugs into the mains and use low voltage LED's which have a minimum life expectancy of 60,000-100,000 hours, due to their long life they are maintenance free. They will illuminate any graphic printed on standard paper or Dura Trans paper, which enables you to change the display as often as you like!
