

CT Series Telescopic Tube Box P - 1600 x 115 x h 115

Ex Tax: 0.00€

Self assembly Telescopic tube boxes are made from Duralong Wave archival micro corrugated board, ideal for long term horizontal or vertical storage. Thanks to their square shape they can be easily stored vertically or stacked horizontally; they allow access to contents without removal from the stack, through the front opening. The closure of the box is secured by two side caps with a central hole, one fixed with very thin velcro (approx 1.0 mm), the other with tabs. Specs: 100% alpha cellulose. Buffered (calcium carbonate reserve), pH 8,5 - 9.0.
