

GRE Series Insect Detector Traps - Pack of 30

Ex Tax: 18.24€

Insect Detector Traps. The pesticide-free way to control insect damage. Collections can be devastated by an insect population, yet overuse of insecticides can damage precious items. These traps work simply with a lure to draw insects into a pesticide-free sticky area. These traps allow you to monitor exhibits, repositories and other areas for insects so that the correct action is taken for the type of infestation. Used for trapping pests, including: woodborers, moths, beetles, silver-fish, booklice, cockroaches and flies. Price per pack of 30 traps.
